GP Announces New Compensating Spray Gun: DCG5010

General Pump has introduced a new compensating rear-inlet spray gun, the DCG5010. The exclusive patent-pending GP design of the DCG5010 offers the unique feature which compensates for changes in pressure. The trigger is designed for low fatigue, allowing for continued use without tiring the hand. All flow passages are designed for minimum pressure drop, and maximum flow and the gun features fluorocarbon seals for maximum high temperature performance. The large comfortable hand grip of this premium gun will accommodate work gloves, making it perfect for long working conditions. Additional venting of the DCG5010 allows for excellent high temperature performance in addition to a durable glass-filled housing and ABS trigger. Call or fax for more information. Phone: 888-474-5487 X199 or 651-686-2199. Fax: 800-535-1745.
