GP Introduces New High Pressure Pump: the KEZ

General Pump has introduced a high-pressure triplex plunger pump, the KEZ Series. The KEZ Series offers versatility with flows from 9.3 to 25.1 GPM and pressures of 1450 PSI. With its unique pressure packing cooling system, this pump can withstand the high pressures. The KEZ also offers a patent pending, symmetrical power end design featuring top and bottom mounting holes allowing for easy left to right shaft conversion. The KEZ features new high performance aluminum alloy connecting rods and a floating wrist pin (enabling extra load at half the weight) This reduces vibrations and off center loads on the bearing for longer life and quieter operation. High volumetric efficiency suction/delivery valves featuring new spherical design of sealing areas combined with patent-pending "high tech" low and high pressure seals, make these perfect pumps for any aggressive environment. Call or fax for more information. Phone: 888-474-5487 X199 or 651-686-2199. Fax: 800-535-1745.
