GP Introduces New M Series

General Pump proudly announces the release of its M line. GP's new "Mud" series consists of three different pumps designed for handling drilling muds typical of the mining industry. This new pump line combines years of testing with the latest in technological advances to provide any drilling tasks with modern, innovative pumping solutions.

Maintenance can be a difficult task when the plumbing work is complicated or the access to the pump is limited. The innovative M Line features front easy access to the pressure packings making replacement of packings and cylinders a matter of minutes. Just eight screws to loosen and packings are ready to be replaced. No special tools required.

Call or fax for more information. Phone: 888-474-5487 X199 or 651-686-2199. Fax: 800-535-1745.
