## GP Introduces New High Pressure Pump: the MW Series

General Pump has introduced a new 100 Hp series of pumps to its New Generation Line, the MW Series. The MW Series offers versatility with flows from 35.9 to 106.5 GPM and pressures up to 4350 PSI. With its unique water lubricated packings, no greasing of the pump is required. The MW offers a patent pending, symmetrical power end design featuring top and bottom mounting holes allowing for easy left to right shaft conversion. Still another valuable feature of the MW Series is the option to include "run-dry" packings. These pumps also offer foot rails which allow for universal mounting as well as helicol gear reduction which reduces noise. Call or fax for more information. Phone: 888-474-5487 X199 or 651-686-2199. Fax: 800-535-1745.
