General Pump Offers Spring Pump School

General Pump offers a unique and innovative training opportunity twice a year at their beautiful Mendota Heights, Minnesota Corporate Headquarters. This training session offers practical hands-on experiences; the way we learn best. General Pump's approach to technical training is through a combination of classroom and hands-on training that will make working with and servicing high pressure pumps and accessories easy to understand. Staffed by experienced GP professionals, each session of the course has been designed to deal with everyday problems encountered on the workbench AND in the field! Our next class offering is April 13-15, 2010. Call or fax soon to reserve your class space. Phone: 888-474-5487 X199 or 651-686-2199. Fax: 800-535-1745.
