## Emperor Platinum Series

GP's Platinum Emperor pumps are specifically designed to handle rigorous duty cycles, high temperatures and chemicals, making them perfectly suited for use in car wash, carpet cleaning and other high pressure cleaning applications. The Platinum pumps feature a forged, nickel-plated stainless steel manifold as well as a nickel-plated crankcase. Of course these pumps also offer the same patented "high tech" packings, ceramic plungers and patent-pending inlet/outlet valve cage as the rest of General Pump's best-selling Emperor Series! Go to [www.generalpump.com](http://www.generalpump.com) for more information.
