Subject: Implementation of New Tariffs - Update

Dear Valued Customer,

I wanted to follow up to my previous letter and be as transparent as possible. We are still experiencing significant cost increases due to tariffs on all imported materials including all pumps and accessories from both Europe and China.

After a thorough analysis, General Pump will be implementing an 8% tariff-related surcharge on all products beginning June 1st. This tariff surcharge is not a price increase but a small offset of the additional costs and fees that we are incurring. This surcharge will allow us to still offer our same great products and service with minimal impact to all our customers.

These charges will be shown as a separate item on your invoice. This approach allows us to clearly identify and isolate the additional costs resulting from imposed tariffs, without altering the base price of our products.

We will continue to closely monitor this very fluid situation and make any necessary adjustments accordingly.

We deeply appreciate your trust in General Pump and your continued support. Should you have any questions or require further clarification, please reach out to your account manager.

My very best regards,

Jack Hill
